FRESH LIFT

Non-Para Deodorizing Block with H₂S Control

FRESH LIFT provides strong deodorizing power while controlling H₂S gas for up to 90 days.

Each block is air activated, eliminating ammonia and H₂S gas smells. The Forest Fresh scent covers any remaining malodors; providing a pleasant botanical blend of fragrance that people will love, but many insects will hate.

FRESH LIFT blocks are:

- VOC compliant in all States;
- Earth Smart® Certified;
- Easy-to-Use;
- Non-flammable;
- Non-para formula compliant in all States.

Each **FRESH LIFT** block measures 7.5" high x 6" diameter and comes in a mesh bag, that makes tying off in lift stations, mains and manholes a breeze. Simply hang above the high water mark, and let **FRESH LIFT** go to work. Best yet, it won't interfere with other water treatment programs you have in use.

FRESH LIFT + Fresh Scent = Happy Neighbors and Workers!
