

UNITED

LABORATORIES

Developed primarily for use in lift stations, **FRESH LIFT** provides strong deodorizing power needed for other applications as well. Use for manholes, mains, bar screens, drying beds, garbage collection areas, grease traps and more.

Earth Smart® formulation is safer in use and safer for the environment. Each block is air activated to provide both deodorizing and H₂S control for up to 90 days, eliminating ammonia and H₂S gas smells.

Forest Fresh scent covers any remaining malodors, providing a pleasant botanical blend of fragrance that people will love, but many insects will dislike.

FRESH LIFT blocks are:

- VOC compliant in all States;
- Earth Smart® Certified;
- Easy-to-Use;
- Non-flammable;
- Non-para formula compliant in all States.

DIRECTIONS FOR USE:

For Lift Stations, Mains and Manholes:

Remove block from the plastic wrapper. Suspend the block in its mesh hanging bag above the high water mark in lift stations; or just below the manhole cover and above the water line in manholes and mains.

For Grease Traps:

Suspend block 4-6" above water level of first chamber. For excessive odor conditions suspend a block in both chambers.

United 851

FRESH LIFT

Non-Para Deodorizing Block with H₂S Control

KEEP OUT OF REACH OF CHILDREN.
See other cautions on back/side panel.

PRECAUCION AL USARIO:

Si usted no puede leer Ingles, pregunte a alguien que le traduzca esta etiqueta para usted antes de uso.
