

UNITED 916

ESA Descaler for Wastewater Dewatering and Collection Systems

Featuring Earth Smart® Acid Technology

Eliminate scale build-up from dewatering equipment, piping and collection system lines safely and effectively with **United 916 ESA Descaler for Wastewater Dewatering and Collection Systems**. Remove lime scale, hard-water deposits, stains, rust, grease and oxidation from equipment and areas that could be harmed by using traditional acids such as muriatic, hydrochloric or sulfuric acids.

- Prevent flow limitation and back-ups by eliminating scale in pipelines.
- Keep UV disinfection systems running efficiently by removing scale build-up, which limits penetration of the UV light.

Features revolutionary Earth Smart® Acid (ESA) Technology:

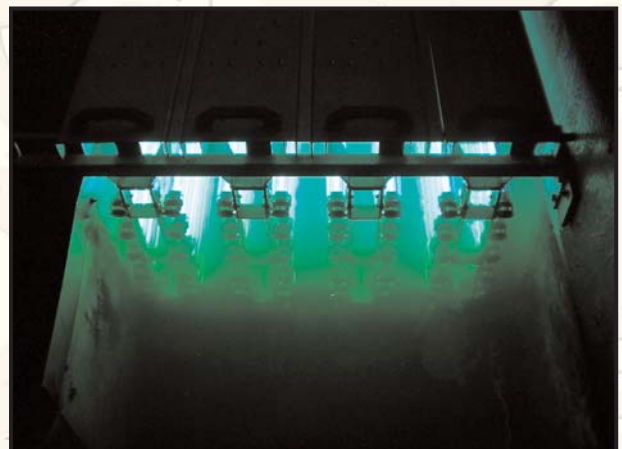

- Dissolves calcium carbonate, lime and scale two to three times faster than phosphoric acid products.
- Much milder to steel, aluminum and skin than traditional acids used in similar products.
- Phosphate-free and contains no VOCs.
