

UNITED

L A B O R A T O R I E S

United 916 is a blend of corrosion inhibitors, penetrants and United's-own Earth Smart® Acid for descaling lime and calcium residue from dewatering equipment, piping and collection system lines. Removes lime, hard water deposits, stains, rust, grease and oxidation from equipment and other areas that could be harmed by strong acids such as muriatic, hydrochloric or sulfuric acids.

United 916 can be left in the system for long periods of time (up to 24 hours) to achieve maximum descaling performance. For ease of use without the need to test pH levels, an indicator dye shows when the descaling process is complete or when product is exhausted.

United 916 features Earth Smart® Acid Technology that:

- Dissolves calcium carbonate, lime, and scale two to three times faster than phosphoric acid products.
- Is much milder to steel, aluminum and skin than traditional acids found in similar products.
- Is phosphate-free and contains no volatile organic compounds (VOCs).

DIRECTIONS:

In mains and other lines: Calculate the pipe volume to be treated, add water and **United 916** at a dilution of 3% **United 916** for light duty applications or 6% **United 916** for heavy duty applications. Product works better if it is circulated through area to be treated. Remove residual using a Vactor truck.

For removing lime deposits from equipment including UV lights: In severe applications use a 6% solution through a Chapin Sprayer or pump sprayer and spray onto surfaces to be cleaned. Allow to stand for several minutes. Rinse residue off equipment. Repeat as necessary. In lighter applications use a 3% dilution ratio. Pump onto contaminated surface at a 3% dilution ratio, allow contact time of several minutes, then rinse residue from the equipment.

For removing struvite build-up: Use product at a 20% solution. Circulate when possible. Dye indicator fades to clear when product is spent.

If foaming is a problem: Use United 53 Defoamer for Municipal and Industrial Applications per the label instructions.

United 916

ESA Descaler for Wastewater Dewatering and Collection Systems

Featuring Earth Smart®
Acid Technology

WARNING
KEEP OUT OF REACH OF CHILDREN.

Manufactured and Sold Exclusively By:
UNITED LABORATORIES, INC.
320 37th Avenue • St. Charles, IL 60174
1-800-323-2594 • www.unitedlabsinc.com

WARNING: Can cause serious eye irritation. Can cause skin irritation. May be harmful if swallowed.

Do not breathe dust/fume/gas/mist/vapors/spray. Wash face, hands and any exposed skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. Store according to local rules and regulations. Dispose of contents/container to an approved waste disposal plant.

FIRST AID:

Immediately call a poison center or doctor/physician.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **Immediately call a poison center or doctor/physician.**

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. **Immediately call a poison center or doctor/physician.**

IF SWALLOWED: Rinse mouth. **Do NOT induce vomiting. Immediately call a poison center or doctor/physician.**

See SDS for more information.

CONTAINS (CAS#): Trade Secret (Proprietary)

DO NOT USE THIS PRODUCT on magnesium or similar surfaces. Always pre-test unknown surfaces for compatibility before using.

An SDS for this product is available through United's website, www.unitedlabsinc.com, providing 24 hour access. Please read the SDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
