

# GASMASTER H<sub>2</sub>S Inhibitor controls H<sub>2</sub>S gas and odors in municipal and industrial collection systems.

## UNITED 988

# GASMASTER

## H<sub>2</sub>S Inhibitor Block

A hefty two-pound block that lasts from 60 to 180 days for a truly low-maintenance approach to odor and H<sub>2</sub>S reduction in manholes, mains and lift stations. Simply drop it in and replace it with a new one when the block is spent.

**GASMASTER H<sub>2</sub>S Inhibitor Block** provides you with the most advanced, low-maintenance biological solution available for controlling H<sub>2</sub>S gas.

## GASMASTER...

- Is specifically blended and adapted to reduce H<sub>2</sub>S gas accumulation by as much as 30%.
- Contains facultative anaerobes which work with or without oxygen.
- Features an extruded substrate that withstands a wide range of temperatures and adverse conditions.
- Is Earth Smart®.
- Is active in entire treatment system, not just part of it.
- Is safe for all types of lines – will not corrode the system.
