

UNITED

LABORATORIES

United 986 MUD MONSTER Mud Remover Block with Inter-Core Technology® combines the staying power of proven block technology with the instant concentrated dosage of a granular active. This two-pound block works continually to break up mud deposits and destroy their cohesive and adhesive forces in collection systems.

MUD MONSTER's slow-release block lasts from 60 to 180 days for a truly low-maintenance approach to mud, sludge and silt control in lift stations, manholes, mains and sumps. Simply drop it in and replace it with a new one when the block is spent.

FEATURES AND BENEFITS:

- **United 986 MUD MONSTER** is the newest technology available for removing deposits primarily composed of the finest organic wastes.
- It disperses the fine particles throughout the water in a fluffy form, so that any water flow of 2.0 feet per second velocity will carry the deposits away.
- Very strong mud (inorganic) action penetrates fine colloidal size particles and ABS detergent deposits.
- Designed to remove inorganic (mud), or organic (sanitary sewage) and sludge deposits from storm and sanitary sewers.
- Easy installation with minimal ongoing attention.
- Block withstands a wide range of temperatures and adverse conditions.
- Safe for all types of lines – will not corrode the system.

DIRECTIONS FOR USE:

Manholes and Mains: In manhole, one or two **MUD MONSTER** blocks (depending on flow) should be placed in the U channel nearly vertically on the upstream end of the U channel.

It is recommended that mains be flushed periodically to remove the mud and silt freed by the use of **United 986 MUD MONSTER**.

DIRECTIONS FOR USE: (continued)

Lift Stations: **MUD MONSTER** block should be used in low flow applications. Suspend the block so the entire block is submerged below the water at its lowest level. Apply one block for every 50,000 GPD flow. For flows in excess of 100,000 GPD, please contact your United Representative.

Sumps: **MUD MONSTER** should be suspended in the sump so the block is just under the surface. Apply one block for every 350 gallons capacity. If capacity is over 350 gallons, spread the blocks out in different sections of the sump.

NOTE:

Surfaces which have come in contact with a liquid solution containing **MUD MONSTER** may become extremely slippery. In those situations, apply United 961 Non-Ammoniated Polymer Solvent to remove spill.

FIRST AID MEASURES:

IF IN EYES: Flush with plenty of water for at least 15 minutes while keeping the eyelids wide open. If irritation persists, seek medical attention.

IF ON SKIN: Wash with soap and water. Launder clothing. If irritation develops, call a physician or poison center.

IF INHALED: Remove to fresh air. Apply CPR if needed. Call a physician or poison center.

IF SWALLOWED: Thoroughly rinse mouth with water. Drink 1 or 2 glasses of water. Slight gastrointestinal discomfort may occur.
